Midterm BFDjango
RMenu

Your main task is to finish the project till the end of your exam :)

Project called **RMenu.**

Project RMenu should have following objects:

1. Restaurant
   a. name
   b. number
   c. telephone
   d. city
   e. user (fk)
2. Dish
   a. name
   b. description
   c. price
   d. user (fk)
   e. restaurant (fk)
3. Review
   a. rating
   b. comment
   c. date
4. RestaurantReview
   a. restaurant (fk)
   b. review (fk)
   c. user (fk)
5. DishReview
   a. dish (fk)
   b. review (fk)
   c. user (fk)

Users can:

1. auth/register
2. Configure Admin Panel for your models
3. After authentication they can create all model objects
4. Review can write anonymous users too
5. There should be CRUD method for all of models
   a. while creating all objects should be linked to current authenticated user

GOOD LUCK :)
